

For more than 90 years, VetterTec has been developing and producing machines and systems for industrial drying and dewatering, primarily for the food industry. Our success is based on more than 140 employees at 5 locations.

VetterTec Inc., our North American location, is a leading provider of custom engineered dewatering and drying systems, which includes pilot plant testing, engineering, design, fabrication and installation of complete systems. Our equipment can be found in many industries including agri-foods, food, dairy, brewery, chemical, wood and minerals. Partial list of equipment we provide includes: Dewatering Screw Press, Steam tube bundle, Flash/Ring, Spray, Fluid Bed, and Rotary (both single and triple pass) dryers.

To strengthen our North American team in Montreal we are looking for a

Process Engineer

We need a hands-on engineer who is comfortable working in an office, pilot plant and site – an exciting opportunity for the right candidate!

Your tasks:

- Developing and evaluating solutions for client applications
- Technical and commercial proposal development
- Design and process calculations for industrial drying systems
- Developing and checking P&ID's and other process documentation
- Process equipment sizing (Material Handling/Air Handling/Combustion)
- Ensure process engineering deliverables comply with the project design and operation philosophies established in the design basis and/or performance specifications
- Pilot plant testing & reporting
- Site commissioning

Your profile:

- Bachelor's degree preferred in Chemical
- 3 – 5 years of experience
- Experience in engineering of agrifood and/or chemical processing equipment
- Knowledge in both process and project environment
- Excellent verbal presentation skills and ability to liaise with clients and suppliers, English essential
- Self-motivated individual with strong customer service focus
- Strong technical communication and presentation skills
- Willing to travel, including some international travel

Your prospects:

- A job in an internationally successful and growing company.
- Your position is particularly responsible and varied.
- In addition, we offer you attractive earning opportunities.
- A very good working atmosphere, dynamic and competent.

Seize your chance and support us actively in the continuous development of our company. We want to continue inspiring our employees and customers with advanced technology, modern structures and good growth.

Together into the future! Are you part of it?

Then please apply at: projectsna@vettertec.com

We look forward to meeting you!
